

Tasmania Forestry Hub

The Tasmania Forestry Hub aims to grow a sustainable and innovative forest industry, that supports and is supported by Tasmania's community.

The Hub is part of a network of 11 Regional Forestry Hubs across Australia.

These were established by the Commonwealth under the 2018 National Forestry Industry Plan.

Funding is committed until 2027 for Hubs to continue providing advice, technical assessment and analyses supporting forestry industry growth.

The Hub has consulted with Tasmanian stakeholders to identify four strategic priorities:

- Carbon Policy
- Workforce, Skills and Training
- Resource and Land Access
- Supply Chain and Infrastructure

The Hub has supported the industry and provided strategic advice on pathways to growth and removal of barriers through delivering 12 projects since its establishment in 2019.

Hub Timeline

2024

Carbon | Timber | Resource

- Workshop: Carbon + Forestry
- Case Study: Commercial Timber Buildings
- Situation Analysis: Tasmanian Forest Sector
- Strategic Plan: Consultation + Update

2023

Policy | Careers

- Policy options supporting forest health + long rotations
- Mapping forestry careers

2022

Demand Study

- Domestic processing + value add
- Long rotation sawlog plantations
- Active forest management
- Bioenergy + agriculture
- Promotion + marketing

2021

Road Map Developed

- Enabling actions for priorities
- Southern Infrastructure Report

2020

Priority Assessment Reports

- Carbon Policy
- Workforce, Careers + Training
- Resource + Land
- Supply Chain + Infrastructure

2019

Establishment | Priority Setting

- Industry Forum: 4 priority areas
- Constraints + opportunities
